MATRIX NEWS:

Dynamac Corporation and RADISE International Join the Team Matrix[®] Partner Network

December 3, 2003 - Matrix Environmental Information Systems (Matrix EIS), a division of Matrix Information Systems, Inc., announced the addition of two new companies to the Team Matrix[™] Partner Network. Engineering firms Dynamac Corporation and RADISE International are the latest organizations to make their respective extensive domain expertise available for Matrix projects requiring multi-disciplined teams.

Matrix EIS delivers a spectrum of environmental IT services including, logical data modeling, data warehousing, analysis, synthesis, and visualization of data. These services enable a simplified approach to environmental research, engineering, and management decision support and application systems. The Team Matrix[™] Partner Network extends these core competencies with our partner's domain and technological expertise. This integrated process and technology approach delivers a higher level of deliverable quality and value to our clients.

Dynamac Corporation is a science, engineering, and technology company with a reputation as an industry leader and innovator. With more than 30 years of experience providing scientific and technical support to its clients, Dynamac has built a staff that includes nationally recognized expertise in the environmental and life sciences. For more information on Dynamac Corporation, please visit: <http://www.dynamac.com>

RADISE International is a multi-disciplinary consulting firm focused on solving infrastructure engineering and software design and development challenges faced by its diverse client base. RADISE is comprised of three divisions offering a full range of geotechnical engineering, construction materials testing and inspection, and customized software development services. For more information on RADISE International, please visit: <http://www.radise.net>
